Services

Project Management

Project Management consists in the ability to coordinate human, material and financial resources throughout the duration and execution of a project, with the final goal of achieving the project objectives and 100% customer satisfaction.

We always follow our clients' requests and needs as well as project quality, work evolution, budget progress, activities planning, activities coordination, material and services acquisition, as well as issuing status reports to help the client in the decision making process.

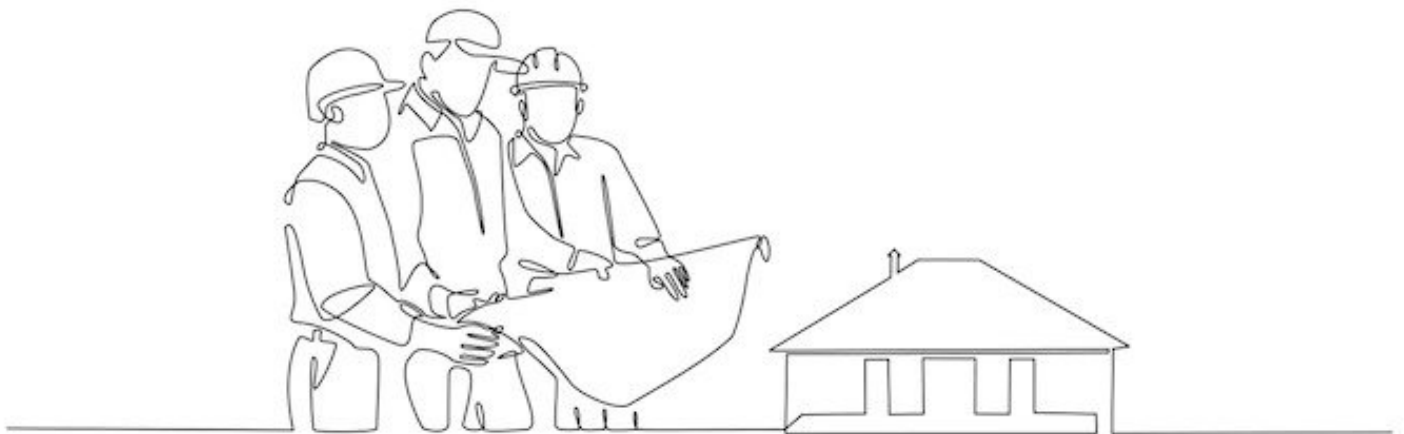

Cost Management

Cost Management has the main objective of maintaining the project within the allocated budget. This is done by working closely with the project's stakeholders, engineers and designers, using a strategy to optimize costs and applying a "money saving attitude". Project Budgeting is part of Cost Management and it shows the necessary finances to be provided in order to successfully finish the project. This is the base of all analysis, projections and planning activities Cost Planning & Cash Flow Estimation allocates to each planned

activity a certain budget as well as setting the financial expectations of the entire project by offering a clear picture from beginning to end. Constant checking of the work and possible changes in the project are also part of this service
