KNOWLEDGE
ENTERPRISE MANAGEMENT

About Us

Like any other sector, Knowledge enterprises also face increasingly competitive environments. It is of great importance for these organizations to optimize time, capital & resource utilization to survive in this business world. To attain this, the organizations need to leave behind the age-old techniques of operation & traditional filing systems involving large cabinets and bulky, hard copy files. A lot of money is spent on administration, when an institution's information management processes are mainly manual. Additionally, manual intervention increases the risk of mistakes creeping into the records of Institution management systems.

C-Net lnfotech Pvt. Ltd. provides a fully integrated web based solution for effective management and administration of a large education institutes called KEM (Knowledge Enterprise Management) which constitutes of an elegant and secured Saas (Software as a Service) platform. It is a smooth integration of all processes required for an effective & systematic management of an institution which includes finance, human resource management, academics, teachings and studies management, examinations, library, and placements. This holistic solution acts as a catalyst for the end to end working of the institution.

Other than the basic modules our solution is capable & mature enough to integrate some premium modules like Recruitment Management System, Attendance Management System, Learning Management System, Vehicle Tracking Management System, Financial Accounting System, RFID based Library Management System,

Smart Card Based Access Control System etc. All these solutions can be integrated depending upon users requirements & thus adds value to the basic college management system.
